

HAVONE MOBILITY — Website Content for Review

Document Version: 1.0 | Date: June 20, 2026

BRAND CONTEXT

Who we are: India-based startup building the foundation for autonomous driving.

Near-term product: IoT device + fleet management SaaS platform (subscription model) for fleet operators — live streaming, real-time tracking, AI safety alerts, vehicle health monitoring.

Long-term vision: Harvest condition-rich Indian road data (monsoons, mixed traffic, unpaved roads) to train autonomous driving AI.

Revenue model: Subscription-based SaaS for fleet operators.

Stage: Early-stage startup, launching product.

PAGE 1: HOME (/)

Hero Section

Headline: The Road to Autonomy Starts With Data

Subheadline: India's first fleet intelligence platform that captures real-world driving data today to power autonomous vehicles tomorrow.

CTA Button 1: Get Early Access **CTA Button 2:** See How It Works

Image prompt: A modern Indian highway at golden hour, shot from inside a truck cabin. A sleek IoT device with green LED indicators is mounted near the windshield. Through the windshield: busy multi-lane highway with trucks, cars, and auto-rickshaws. Subtle data visualization overlay tracking vehicles ahead. Cinematic composition. Color palette: deep blacks, electric green (#8DC313) accents, warm amber. Photorealistic.

Trust Bar

Heading: Backed By Vision. Built for India.

Replace logos with:

- IIT [University Name] — Research Partner
- [Incubator Name] — Backed By
- AWS Activate — Cloud Partner
- NVIDIA Inception — AI Partner

(Or simply: "Launching Soon — Join Our Early Fleet Partner Program")

Image prompt: N/A (text/logo-based)

Road Accident Map Section

Heading: The Problem We're Solving

Subheading: India loses over 1.7 lakh lives to road accidents every year. Over 90% are caused by human error. We're building the data infrastructure to change this.

Body: Every kilometer driven with HAVONE captures critical safety data — near-misses, harsh braking events, blind-spot incidents, and road conditions. This data powers real-time alerts for fleet operators today and trains the autonomous AI that will save lives tomorrow.

Image prompt: Dark data-visualization style map of India at night with glowing route lines connecting major cities. Red pulse points at accident hotspots. Green flowing lines showing active fleet routes. Black background, green (#8DC313) and red accents. Futuristic infographic style.

Features Grid

Heading: One Platform. Complete Fleet Intelligence.

Subheading: Everything fleet operators need to run smarter, safer operations — from real-time tracking to AI-powered safety.

Card 1:

- Title: Live Fleet Tracking
- Description: Real-time GPS tracking with 10-second refresh. Monitor every vehicle's position, speed, and route on a single dashboard.
- Icon: location_on

Card 2:

- Title: HD Live Streaming
- Description: Watch any vehicle live from your phone. Dual cameras capture road and cabin views simultaneously with cloud recording.
- Icon: videocam

Card 3:

- Title: AI Safety Alerts
- Description: Instant detection of harsh braking, lane departure, drowsiness, and over-speeding. Push notifications to operators and drivers.
- Icon: warning

Card 4:

- Title: Data & Analytics
- Description: Trip reports, fuel efficiency, driver scorecards, and predictive maintenance — powered by machine learning on real driving data.
- Icon: analytics

Image prompt: Clean dashboard UI mockup showing fleet management interface on monitor and mobile phone. Map with vehicle dots, live video feed thumbnail, and safety alert cards. Dark theme with green (#8DC313) accents. Professional SaaS product aesthetic.

Tech Showcase

Heading: Technology That Sees Everything

Tab 1 — Sensors:

- Title: Multi-Sensor Intelligence

- Description: Our device combines cameras, GPS, accelerometer, gyroscope, and OBD-II to build a complete digital twin of every journey.
- Specs: Camera → 1080p | GPS → 2m accuracy | Refresh → 30 FPS

Tab 2 — Edge AI:

- Title: On-Device Processing
- Description: Edge AI processes video and sensor data locally — detecting events in real-time without depending on network. Critical for India's patchy connectivity.
- Specs: Processing → 4 TOPS | Latency → < 100ms | Storage → 256GB

Tab 3 — Connectivity:

- Title: Always Connected
- Description: 4G LTE with auto-fallback to 2G. Data syncs automatically when connection restores — works across highways, rural stretches, and dead zones.
- Specs: Primary → 4G LTE | Fallback → 2G/3G | Sync → Auto-resume

Tab 4 — Data Collection:

- Title: Safety Data Harvesting
- Description: Every trip generates labeled data — road quality, traffic density, sign detection, pedestrian behavior, weather. This trains our autonomous driving AI.
- Specs: Data → 30+ points/sec | Storage → Cloud + Edge | Labels → Auto-generated

Image prompt: Close-up product shot of the HAVONE IoT device (smartphone-sized) mounted on a truck windshield. Black matte finish, green LED ring, multiple camera lenses. Studio environment, dramatic side lighting, blurred road through windshield background. Apple-level product photography.

Stats Section

Heading: Built for Indian Roads

Note: Since we're pre-launch, use aspirational/capability language:

- Stat 1: 30+ → Data Points Per Second (desc: Captured from every journey)
- Stat 2: 4G + 2G → Always Connected (desc: Even in rural India)
- Stat 3: < 100ms → Edge AI Response (desc: Real-time safety detection)
- Stat 4: 24/7 → Live Monitoring (desc: Your fleet never sleeps)

Image prompt: N/A (dark background design section)

CTA Section

Badge: Now Accepting Early Partners

Headline: Ready to See Your Fleet Like Never Before?

Subheadline: Be among the first fleet operators in India to deploy HAVONE. Limited early-access slots available — no upfront hardware cost.

CTA 1: Apply for Early Access **CTA 2:** Talk to Our Team

Trust indicators:

- Data Security Certified
- Made in India

- 24/7 Support

Image prompt: N/A (design-driven section)

PAGE 2: ABOUT (/about)

Hero Section

Label: Our Mission

Headline: Making Indian Roads the Safest in the World.

Body: HAVONE MOBILITY was born from a simple belief: the data to prevent 1.7 lakh annual road deaths already exists — on every road, in every journey. It just needs to be captured intelligently. We're building the platform to do exactly that.

Image prompt: Diverse team of young Indian engineers (5-6 people, mixed gender) in modern startup office, around a screen showing fleet map data. Exposed brick, plants, whiteboards. Natural light. Candid, authentic. Documentary photography.

Journey Section

Heading: Our Journey

2023 — The Spark: Founded with one question: "What if every truck on Indian roads could see and learn?" First IoT prototype built in a garage.

2024 — Building: Hardware refined. Software platform built. First conversations with fleet operators. Product-market fit discovered.

2025 — Launch: First devices deployed on real vehicles. Platform goes live. Early fleet partners onboarded. The data starts flowing.

The Future — Autonomy: Billions of kilometers of labeled Indian driving data. The world's most robust autonomous driving AI — born from the world's most complex roads.

Image prompt: Timeline visual: hand-drawn PCB sketch (left) → polished IoT device on desk (center) → futuristic autonomous truck on highway (right). Connected by flowing green line. Clean editorial illustration, white background, minimalist.

R&D Section

Label: Core Focus **Heading:** Three Pillars of Innovation

Pillar 1 — Sensor Intelligence: We design IoT devices that see, hear, and measure everything a vehicle encounters — road surface, weather, traffic patterns, and driver behavior.

Pillar 2 — AI & Machine Learning: Our models learn from real driving events to predict hazards, optimize routes, and score driver safety — all in real-time.

Pillar 3 — Data-First Autonomy: Every deployed device is a data collection node. We're building the largest labeled driving dataset from Indian roads — the most challenging driving environment on earth.

Image prompt: Three isometric illustrations: (1) IoT device with sensor rays, (2) Neural network with flowing data, (3) Truck silhouette with data streams into cloud. Black and green palette on white. Tech startup aesthetic.

Careers Section

Label: Join Us **Heading:** Build the Future of Indian Mobility

Body: We're a small, intense team obsessed with making Indian roads safer. Hardware meets AI meets real-world impact. If that excites you, we should talk.

Why HAVONE?

- Your code runs at 100km/h on real roads
- Hardware + software — build the full stack
- India-first problem, global ambition
- Early-stage equity + competitive pay
- Talk to founders every day

Image prompt: Candid shot of 2-3 Indian engineers at workbench with PCB boards, IoT device, soldering iron, oscilloscope, laptop. Modern co-working space. Natural light. Documentary style.

Leadership Section

Label: The Team **Heading:** Founded by Builders

(To be filled with actual founder details)

- **[Founder 1]** — CEO / Vision
- **[Founder 2]** — CTO / Technology
- **[Founder 3]** — COO / Operations

Image prompt: Professional headshots, neutral background. Modern, approachable — YC founder style. Consistent framing. Casual-professional attire.

CTA Section

Headline: We're Hiring Obsessive Builders. **CTA:** View Open Roles

PAGE 3: TECHNOLOGY (/technology)

Hero Section

Label: The Platform

Headline: See Everything. Miss Nothing.

Body: HAVONE's IoT platform combines edge AI, multi-sensor fusion, and cloud intelligence to give fleet operators superhuman visibility. Every data point captured today trains the autonomous systems of tomorrow.

Image prompt: Dramatic dark product shot of HAVONE IoT device from low angle on metal stand. Camera lenses catching light, green LED glow on edges. Blurred fleet dashboard on screen behind. Studio black background. Cinematic, premium feel.

Hardware Evolution

Heading: Hardware Lineage

V1.0 (2023) — Prototype: Single camera, GPS, basic OBD-II. Manual SD card data upload. Proof of concept.

V2.0 (2024) — Production: Dual camera (road + cabin), 4G connectivity, edge AI for event detection, OTA updates.

V3.0 (2025) — Current: Multi-sensor array, 4 TOPS neural processor, 256GB smart cache, 5G-ready architecture.

Image prompt: Three devices left to right: rough prototype with visible PCB/wires → cleaner black production unit → sleek premium device with seamless design and multiple lenses. Evolution shot on dark gradient background. Professional hardware photography.

Digital Cockpit

Heading: The Operator Dashboard **Subtitle:** Fleet Intelligence at Your Fingertips

Body: A unified command center for fleet operators. Monitor vehicles, watch live streams, receive AI alerts, and access analytics — all from one screen. Web, iOS, and Android.

Features:

- Live map with all vehicle positions
- One-tap live video from any vehicle
- AI safety alert feed
- Driver scorecards and trip history
- Geofencing and route compliance
- Fuel and maintenance analytics

Image prompt: UI screenshot of fleet management dashboard (dark theme). Map with green vehicle dots, driver list sidebar, live video panel, alert notifications. Dark background (#1a1a1a), green (#8DC313) accents. Polished, production-ready SaaS UI.

Sensor Fusion

Heading: Sensor Architecture

Body: One sensor isn't enough. HAVONE combines camera vision, IMU data, GPS, vehicle diagnostics, and connectivity into a redundant, intelligent system that understands every driving moment.

Sensor breakdown:

- Dual Camera (Road + Cabin) — 1080p, 30fps, IR night vision
- 9-axis IMU — Accelerometer, gyroscope, magnetometer
- GNSS — GPS + GLONASS, 2m accuracy, 10Hz
- OBD-II / CAN Bus — Speed, RPM, fuel, engine codes
- 4G LTE + WiFi — Always-on with offline buffer

Image prompt: Exploded/disassembled view of IoT device showing internals — camera modules, PCB, antenna, IMU sensor, connectors. Floating in space on dark background. Green accent lighting on key components. Technical but artistic. Premium hardware teardown style.

Hero

Label: For Fleet Operators

Headline: Your Fleet. Fully Visible. Fully Controlled.

Body: HAVONE gives fleet operators complete situational awareness — live video, real-time location, AI safety alerts, and actionable insights. One device, one subscription, total control.

Image prompt: Fleet operations room with large curved monitor wall showing vehicle feeds, maps, analytics. An operator (Indian, professional) standing with tablet. Blue-black ambient lighting, green data visualizations. Corporate tech photography.

Solutions Grid

Card 1 — Long-Haul Fleets:

- Label: Highway Operations
- Title: Own the Highway
- Body: Track trucks across national highways in real-time. Instant alerts on diversions, unauthorized stops, and driver fatigue. Live stream any vehicle to your phone.

Card 2 — Last-Mile Delivery:

- Label: Urban Logistics
- Title: Every Delivery, Visible
- Body: Monitor delivery fleets in congested cities. Optimize routes, track completions, and ensure driver safety in India's busiest corridors.

Card 3 — Passenger Transport:

- Label: Safety First
- Title: Passenger Safety, Guaranteed
- Body: Live tracking, panic alerts, and AI-monitored driving for school buses, corporate shuttles, and ride services. Parents and operators get real-time peace of mind.

Card 4 — Insurance & Compliance:

- Label: Data-Driven Risk
- Title: Underwrite with Certainty
- Body: Driving data for usage-based insurance, claims verification, and compliance. Video evidence and telematics for every incident.

Image prompt: Split composition showing four scenarios: (1) Long-haul truck on highway at dusk, (2) Delivery van in busy Indian city, (3) School bus with children, (4) Insurance professional reviewing dashcam on laptop. Quadrants separated by green lines. Consistent warm lighting.

Integration / API Section

Heading: Built for Integration

Body: Open REST API and webhooks to plug HAVONE into your existing TMS, ERP, or custom tools. Real-time streams, historical data, and analytics — all programmable.

- REST API — 99.9% uptime SLA
- WebSocket — Real-time event streams

- Webhooks — Configurable alert notifications
- SDKs — iOS, Android, Web
- Access Control — SSO + role-based permissions

CTA

Headline: Start Your Pilot in 7 Days

Body: No upfront hardware cost. No long-term lock-in. Deploy on 10 vehicles free. See the difference in week one.

CTA: Apply for Free Pilot

PAGE 5: NEWSROOM (/newsroom)

Hero

Headline: News & Updates

Body: Product launches, partnerships, and milestones on our road to autonomous mobility.

Press Releases

(To be populated with real announcements. Structure:)

- **"HAVONE MOBILITY Launches Fleet Intelligence Platform for Indian Operators"** Date, 1-2 line summary.
 - **"HAVONE Joins [Incubator/Accelerator] to Scale Hardware Production"** Date, 1-2 line summary.
 - **"First Fleet Partner Deploys HAVONE Across [X] Vehicles"** Date, 1-2 line summary.
-

Blog Highlights

(Links to latest 3 blog posts from /blog)

Events

(Upcoming demo days, conferences, etc.)

Image prompt: Press/newsroom hero: Stage or podium with HAVONE logo on screen. Tech event setting, dramatic stage lighting, green accent. Empty stage ready for presentation. Event photography, wide angle.

PAGE 6: BLOG (/blog)

Categories:

Technology | Safety | Product | Industry | Data & AI | Company

Sample Posts:

1. **"Why Indian Roads Are the Ultimate Training Ground for Autonomous AI"**

- Category: Data & AI
- Hook: India's chaos — cattle crossings, unmarked speed bumps, monsoon flooding — creates the world's richest edge-case dataset for robust AV training.

2. "Inside HAVONE's IoT Device: A Hardware Deep-Dive"

- Category: Technology
- Hook: Dual cameras, IMU, 4G, edge AI — every design choice optimized for India's extreme conditions.

3. "How Live Streaming Reduces Fleet Theft by 60%"

- Category: Product
- Hook: Real data showing how real-time video deters unauthorized usage and enables instant response.

4. "The True Cost of Road Accidents for Fleet Operators"

- Category: Industry
- Hook: Beyond human tragedy — the financial impact on fleet businesses and how data-driven safety pays for itself.

5. "From Fleet Data to Autonomous Driving: Our Roadmap"

- Category: Company
- Hook: How every HAVONE device is a building block for India's autonomous future.

Image prompt (blog hero): Aerial view of busy Indian intersection — trucks, cars, auto-rickshaws, two-wheelers, pedestrians. Data overlay: green bounding boxes on vehicles, trajectory lines, small labels. Real photography + data visualization blend. Editorial quality.

PAGE 7: CAREERS (/careers)

Hero

Headline: Build What Matters.

Body: Hardware, AI, and real-world impact. We're building the platform that makes Indian roads safer today and autonomous tomorrow. Come build with us.

Values

- **Ship Real Things** — Our code runs on actual roads at 100km/h.
- **Data Obsessed** — We measure everything. Opinions are secondary.
- **India-First, World-Class** — Solving for India's complexity makes us global-ready.
- **Speed Over Perfection** — V1 ships, V2 improves, V3 scales.

Benefits

- Early-stage equity + competitive salary
 - Health insurance (you + family)
 - Flexible work: office + remote
 - Hardware lab — build real devices
 - Learning budget
 - Flat hierarchy — founders accessible daily
-

Open Positions

(To be updated with real roles)

- Embedded Systems Engineer — Firmware, C/C++, RTOS, sensors
 - Full-Stack Engineer — React, Node.js, real-time dashboards
 - ML Engineer (Computer Vision) — Object detection, event classification
 - Hardware Design Engineer — PCB, enclosures, thermal
 - Fleet Partnerships Manager — Sales, onboarding, relationships
 - DevOps / Cloud — AWS/GCP, video pipelines, data infrastructure
-

CTA

Headline: Don't See Your Role?

Body: We're always looking for exceptional people. Send us a note.

CTA: Submit General Application

Image prompt: Small startup team (4-5 Indian, mixed gender) at table with laptops, IoT prototypes, PCB boards. Co-working space, natural light. Whiteboard with architecture diagrams in background. Authentic, energetic. Documentary style.

PAGE 8: CONTACT (/contact)

Hero

Headline: Let's Talk

Body: Fleet operator looking to modernize? Investor exploring the space? Engineer wanting to build? We'd love to hear from you.

Contact Details

- Email: hello@havone.com
 - Location: India (city TBD)
 - Response time: Within 24 hours
-

Form Fields

- Name (required)
 - Email (required)
 - I am a... [Fleet Operator / Investor / Job Seeker / Media / Other]
 - Message (required)
 - Privacy policy checkbox
-

Map/CTA Area

Body: Based in India, building for Indian roads.

Image prompt: Overhead shot of Indian city skyline at blue hour. Modern buildings, highway/flyover with traffic light trails. Bangalore, Mumbai, or Hyderabad. Teal/blue tone with warm streetlight amber. Wide angle, architectural

photography.

IMAGE PROMPTS — CONSOLIDATED

#	Page	Section	Prompt
1	Home	Hero	Indian highway from inside truck cabin. IoT device on windshield with green LED. Busy traffic ahead with data overlay lines. Golden hour. Cinematic.
2	Home	Road Accident Map	Dark data-viz India map at night. Glowing green route lines between cities. Red hotspot pulses. Black background, infographic style.
3	Home	Features	Fleet dashboard UI mockup on monitor + phone. Map with dots, video feed, alerts. Dark theme, green accents. SaaS product shot.
4	Home	Tech Showcase	Close-up HAVONE IoT device on truck windshield. Black matte, green LED ring, camera lenses. Studio lighting, blurred road behind. Apple-style product photo.
5	About	Hero	Indian engineering team (5-6 people) in startup office around screen with fleet data. Candid, authentic, natural light.
6	About	Journey	Timeline: hand-drawn PCB → polished device → autonomous truck. Green connecting line. Editorial illustration.
7	About	R&D	Three isometric illustrations: IoT device with sensors, neural network, truck with data streams. Black+green on white.
8	About	Careers	2-3 engineers at workbench with PCBs, soldering iron, device. Co-working space. Documentary style.
9	Technology	Hero	Dark dramatic product shot of IoT device on metal stand. Green LED glow. Fleet dashboard blurred behind. Premium cinematic.
10	Technology	Hardware	Three devices showing evolution: rough prototype → production unit → sleek V3. Dark gradient background.
11	Technology	Dashboard	Fleet management UI screenshot (dark theme). Map, vehicle list, video panel, alerts. Polished SaaS design.
12	Technology	Sensor Fusion	Exploded device view showing internals: cameras, PCB, antenna, IMU. Dark background, green accent lighting. Artistic teardown.
13	Solutions	Hero	Fleet ops control room, large monitor wall, Indian operator with tablet. Blue-black lighting, green data viz.
14	Solutions	Grid	Four quadrants: highway truck, city delivery van, school bus, insurance person with laptop. Green dividing lines.
15	Newsroom	Hero	Stage/podium with HAVONE logo on screen. Tech event, dramatic lighting, green accent.

16	Blog	Hero	Aerial Indian intersection with data overlay — bounding boxes, trajectory lines on vehicles. Real photo + AI viz blend.
17	Careers	Hero	Startup team at table with laptops, prototypes, PCBs. Co-working space, natural light, whiteboard diagrams.
18	Contact	Hero	Indian city skyline at blue hour. Buildings, highway with light trails. Teal/blue tone, wide angle.

NOTES FOR REVIEW

1. **No fake stats used** — All numbers reference device capabilities (refresh rate, data points/sec), not deployment metrics we don't have yet.
2. **Tone:** Confident but honest. We're early-stage and proud of it. "Launching" not "leading."
3. **India-first messaging:** The Indian road complexity is positioned as a competitive advantage, not a limitation.
4. **Long-term vision mentioned but not overpromised:** Autonomous driving is the north star, fleet intelligence is the current product.
5. **Image prompts are ready** for AI generation (DALL-E, Midjourney) or can guide a photographer.
6. **Placeholder brackets [X]** indicate spots where you'll fill real details (founder names, city, partner names).

Please review and mark up any sections you'd like changed before we implement into the codebase.
